

## Continuing our Capstone Experience Dialogue in Break Out Groups

Using the assigned project card at your table, imagine what a capstone experience may look like in your department if it adopted the capstone type written on the card. Please write down the challenges or opportunities that the adoption of this capstone style may present to your students and faculty.

- How might this particular capstone style fit your disciplinary goals, help you stretch or ease your department's resources, or lead to new partnerships within and outside of your department?
  
  
  
  
  
  
  
- How might this capstone help you assess connections students are making between general education and disciplinary goals?

Call for additional Capstone Information

Please review the list of departments that provided data for the 2012 capstone experience survey, if your department is missing, who could we talk with to better understand your department's perception and experience with undergraduate capstones?
